

A unique patented parcelbox lock.

Lock can be pre-set so that the door **can be opened once without a key**. When the door and lock is closed it locks. A locked door can only be opened with a key.

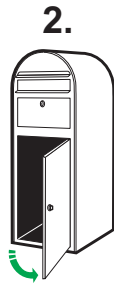

A locked parcelbox is pre-set for parcel delivery by turning the lock horizontally with the key.

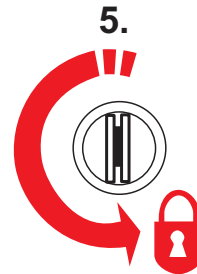

ok!

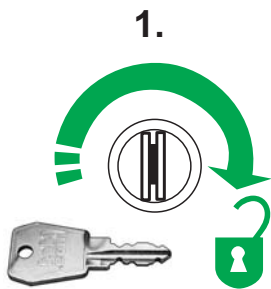

1. The parcel delivery person opens the pre-set lock without a key by turning the lock clockwise.

2-4. The door is opened, the package is placed inside and the door is closed

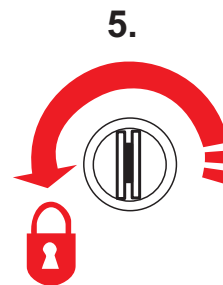

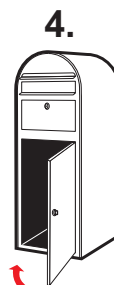

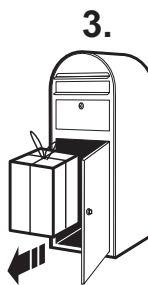

5. The door is locked by by turning the lock counter-clockwise.

1. A locked parcelbox can be opened only with the key

2-4. The door is opened, the package is removed and the door is closed.

5. The door is locked by by turning the lock counter-clockwise. If desired, the lock can now again be pre-set to receive a new package delivery.
